DIRECT WIRELESS UNITS

The Direct Wireless Network is Australia's only Private IP network dedicated solely to the transmission of alarm signals and data. With the stability and security of Direct Wireless now complimented by the performance and coverage of Telstra's Next G & Optus 3G Network, Direct Wireless continues to lead the way of delivering unparalleled layers of network performance and redundancy as never seen before in the Australian Security Industry.

The unit comes with both Telstra Next G and Optus 3G SIM Cards. Connection to a PSTN line and/or IP Network is available providing additional monitoring coverage. There is also a spare output available which enables control room operators to remotely arm & disarm* (if required).

Monitoring and Network Fees

Plan Name	Service Description	Fees (weekly)
12 HR – Single	12 hour supervision back to base Telstra Next G SIM Card	$10
